4th annual walk/fun run 2012

**CURED**
campaign urging research for eosinophilic disease

**Eosinophilic Esophagitis**, or EE for short, is a complicated digestive system disorder in which eosinophils (a type of white blood cell) are found in abnormal amounts in one or more specific places in the digestive system.

“**Our goal is to raise money to help find a cure to stop this disease for us and for all the people who suffer from it.**”

For Joshua, Connor, Luke and Karrington, pain is a part of everyday life. All of them suffer from eosinophilic disorders. As a result, Josh lives with daily chest pain and nausea, while Connor, Luke and Karrington live with stomach pain and food issues.

**NO ONE SHOULD HAVE TO LIVE THIS WAY!**

100% of the funds donated for this Walk will go to research. The costs incurred to put this event together will be covered through the generosity of our sponsors. For more information about EE, please visit:
