

COULD YOUR CHRONIC GASTROINTESTINAL SYMPTOMS BE A SIGN OF SOMETHING ELSE?

GI symptoms like:

- Abdominal pain
- Nausea/Vomiting
- Diarrhea
- Early fullness when eating
- Cramping
- Bloating
- Loss of appetite

OR

An unresolved GI condition like:

- Irritable bowel syndrome (IBS)
- Chronic indigestion
- Gastroesophageal reflux (GER)
- Eosinophilia of the duodenum (small intestine)

MAY SUGGEST YOU HAVE

EOSINOPHILIC DUODENITIS (EoD)

A clinical study of an experimental drug for eosinophilic duodenitis (AK002-021) is looking for patients

WHO IS ELIGIBLE

Females and males, age 18 to 80 years old who have a confirmed diagnosis of EoD AND/OR have ongoing gastrointestinal symptoms may be eligible for screening

PARTICIPATION DETAILS

- Qualified participants will receive medication, lab tests and medical care related to the study at no cost
- Participants are eligible for compensation to cover the cost of time and travel
- Learn more at www.clinicaltrials.gov – NCT# 04856891
